📍 Surat, Gujarat - India

## SUMMARY

Entry-level Web developer. Looking for an entry-level opportunity to boost my career in web development. Strong interest in learning new technologies.

## PROJECTS

### Schedule Mate

- Designed and developed a Schedule Manager using Asp.Net Web Forms and SQLServer.
- User can manage different types of schedules and complete tasks daily.
- User can get analysis via graph.
- User can also manage their profile and password.
- Also implemented Authentication & Authorization using Session.

### Event Management System

- Design and developed an Event Management System Web application using Advance Java (JSP & Servlet) for organizing and participating in different events.
- Developed system capabilities to drive event registrations.
- Used JDBC API with MySQL database to create event objects, and to store the objects in a database
- Improved application abstraction by using Java packages to declare all functions and methods, resulting in an increase in abstraction throughout the application.

### Expense Manager

- Created an expense manager using PHP, HTML, CSS, and JavaScript that tracks user spending habits and displays the data in a pie chart.
- Built an Expense Manager, which gives details of all the expenses by the user using charts and graphs using google charts.
- There are various modules included in the project such as user profile, login, and managing the expense.

## EDUCATION

**Bachelor of Science (Computer Science)**  
**Veer Narmad South Gujarat University**   
06/2019 – 05/2022 | Surat, Gujarat

## TECHNICAL SKILLS

HTML	CSS	Java Script	
WordPress	PHP	MySQL	
SQLServer	C++	Java	Python
C#	Git/GitHub	BootStrap	
Asp.Net	Asp.Net Web Forms		

## COURSE WORK

Version Control

Git/GitHub

Database Management System

Computer Networks

Operating System

## INTEREST

Web Development	Learning Technologies
Problem Solving
